**Mead Elementary PTSA is holding 9 weeks of Robotics Classes this spring session for our 1st through 5th graders, Tuesdays 3:05 PM to 4:05 PM.**

**LEGO® WeDo®** is an easy-to-grasp software programming and engineering system that introduces young students to robotics. Students build various contraptions that use a motor, sensors, and the programming that they themselves create with the special WeDo® Software.

Your student may know little to nothing about programming currently, but in this class they will find out how fun and creative it can be when they learn that they can control the robots that they build.

**Science, Technology, Engineering, and Math have never been so much fun!**

**Enroll your student/s today** in this challenging and engaging course that is not a "free play with LEGO®'s" or "follow these instructions" class, but a workshop of discovery and creativity.

During the course they will be learning;

- Teamwork
  - Engineering and programming concepts
  - Experimentation
- and also either show their discoveries to their fellow robotic engineers or compete in one of our many fun engineering challenges.

**Dates: 4/12, 4/19, 4/26, 5/3, 5/10, 5/17, 5/24, 5/31, 6/7**

---
